## Healthy Smile chart

Use this chart to track your child's daily brushing habits. Each time your child brushes in the morning and at night, they earned a star for the day! At the end of the week if they have earned stars for all 7 days they win a prize! Suggestion: Trips to the park, stickers or a small toy are perfect prizes. *DO NOT reward good dental behavior with sweets or candy.*

### A HEALTHY SMILE FOR YOUR CHILD

The normal groove of a tooth is too small and deep for a toothbrush to clean well.

When our teeth are not cleaned well germs build up and cause tooth decay (cavity). A cavity can cause your child pain, leading to missed school days, costly dental treatment, and possible tooth loss.

A sealant is a thin plastic that flows down into the tooth's grooves making a smooth surface that can be cleaned easily with a toothbrush.

Along with sealants, brushing and flossing every day can help prevent cavities.

**OHP members** – Sealants are a covered benefit for children. Schedule an appointment with your dentist today! If you do not have a dentist call your dental plan (the number is located on your insurance card).
